

Solution Requirements

Date	15 July 2026
Team ID	SWTID-2026-2089
Project Name	Credit Card Approval Prediction using Machine Learning
Maximum Marks	4 Marks

Functional Requirements

S.No	Category	Description	Priority
1	Authentication	Secure user login/access before prediction	High
2	Authorization	Admin manages model; user performs prediction	High
3	External Interfaces	CSV datasets and trained .pkl model	Medium
4	Transaction Processing	Process applicant data and generate prediction	High
5	Reporting	Prediction, accuracy, ROC, confusion matrix	Medium
6	Business Rules	Preprocessing and Random Forest logic	High
7	Compliance	Follow data privacy and security practices	Medium
8	Other	Export trained model and reports	Low

Non-Functional Requirements

S.No	Category	Description	Acceptance Criteria
1	Performance	Fast prediction	<2 seconds
2	Scalability	Supports large datasets	10000+ records
3	Security	Protect applicant data	Controlled access
4	Reliability	High availability	99.9% uptime
5	Usability	Simple interface	Easy to use
6	Maintainability	Modular code	Easy updates
