

Technology Stack

Date		15 July 2026	
Team ID		SWTID-2026-2089	
Project Name		Credit Card Approval Prediction using Machine Learning	
Maximum Marks		2 Marks	
S.No	Architecture Layer	Technology Chosen	Justification / Purpose
1	Frontend / Client	HTML, CSS	Responsive user interface for prediction results
2	Backend / Server	Python, Flask	Model inference and request handling
3	Database / Storage	CSV Files (application_record.csv, credit_card_application.csv)	Store training data used for ML model
4	Cloud / Deployment	Google Colab	Model development and execution environment
5	Version Control & CI/CD	GitHub	Source code management and collaboration
6	Third-Party Tools	Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn	Data processing, model training, evaluation, visualization, and model deployment
