

Problem-Solution Fit

Date	15 July 2026
Team ID	SWTID-2026-2089
Project Name	Credit Card Approval Prediction using Machine Learning
Maximum Marks	5 Marks

Problem-Solution Fit Canvas

Section	Content
1. Customer Segments	Banks, Financial Institutions, Credit Card Applicants
2. Problems / Pains	Manual approval is slow, error-prone, and inconsistent.
3. Triggers to Act	Need for faster, fair, and accurate credit decisions.
4. Emotions	Before: Anxiety, uncertainty. After: Confidence and transparency.
5. Available Solutions	Traditional manual verification; time-consuming and costly.
6. Customer Limitations	Limited credit history, incomplete documents, varying income.
7. Behavior	Applicants submit details and wait for approval results.
8. Channels	Online: Web portal, Email. Offline: Bank branch.
9. Root Cause	Manual processing and difficulty analyzing multiple applicant factors.
10. Your Solution	Random Forest ML model predicts approval using applicant and credit history data.
